Participant ID: 428645 / Password: 433992**

In June, VSWCD announced the beginning of the 18-month Environmental Assessment Phase of the Lower Vermilion River Watershed Plan in which a number of possible Alternatives will be evaluated.

This public scoping webinar will be held to explain the Alternative studies and environmental assessment to be included in the Lower Vermilion River Watershed Plan.

The public is invited to participate in the online Public Scoping Webinar to view alternatives, ask questions and offer comments.

Participants are encouraged to log on prior to the meeting start time but are welcome to join at any point throughout the virtual event. Interactive conference technology provider Zoom will be used to facilitate the meeting. More information and instructions for logging into the meeting via Zoom are available on the VSWCD website, www.lvrwp.com.

Virtual public hearings and meetings are supported by the EPA in order to provide meaningful public participation and engagement during the Novel Coronavirus Disease (COVID-19) Outbreak.
